

C Program - Day-3 Class Assignment

1. Write a C program to read an array of 10 integers and count the total number of even and odd elements.

Sample Output:

Enter 10 integers: 1 2 3 4 5 6 7 8 9 10

Total even numbers: 5

Total odd numbers: 5

2. WAP that reads two arrays, calculates the sum of corresponding elements, and stores the result in a third array.

Sample Output:

Enter 5 elements for the first array: 1 2 3 4 5

Enter 5 elements for the second array: 6 7 8 9 10

Sum of the arrays: 7 9 11 13 15
