

PASL = Parallel Algorithm Scheduling Library

C++ library from the Deepsea project

Your program
e.g. example/fib.cpp

sched
Scheduling, granularity control

parutil
Locks, barriers, worker threads

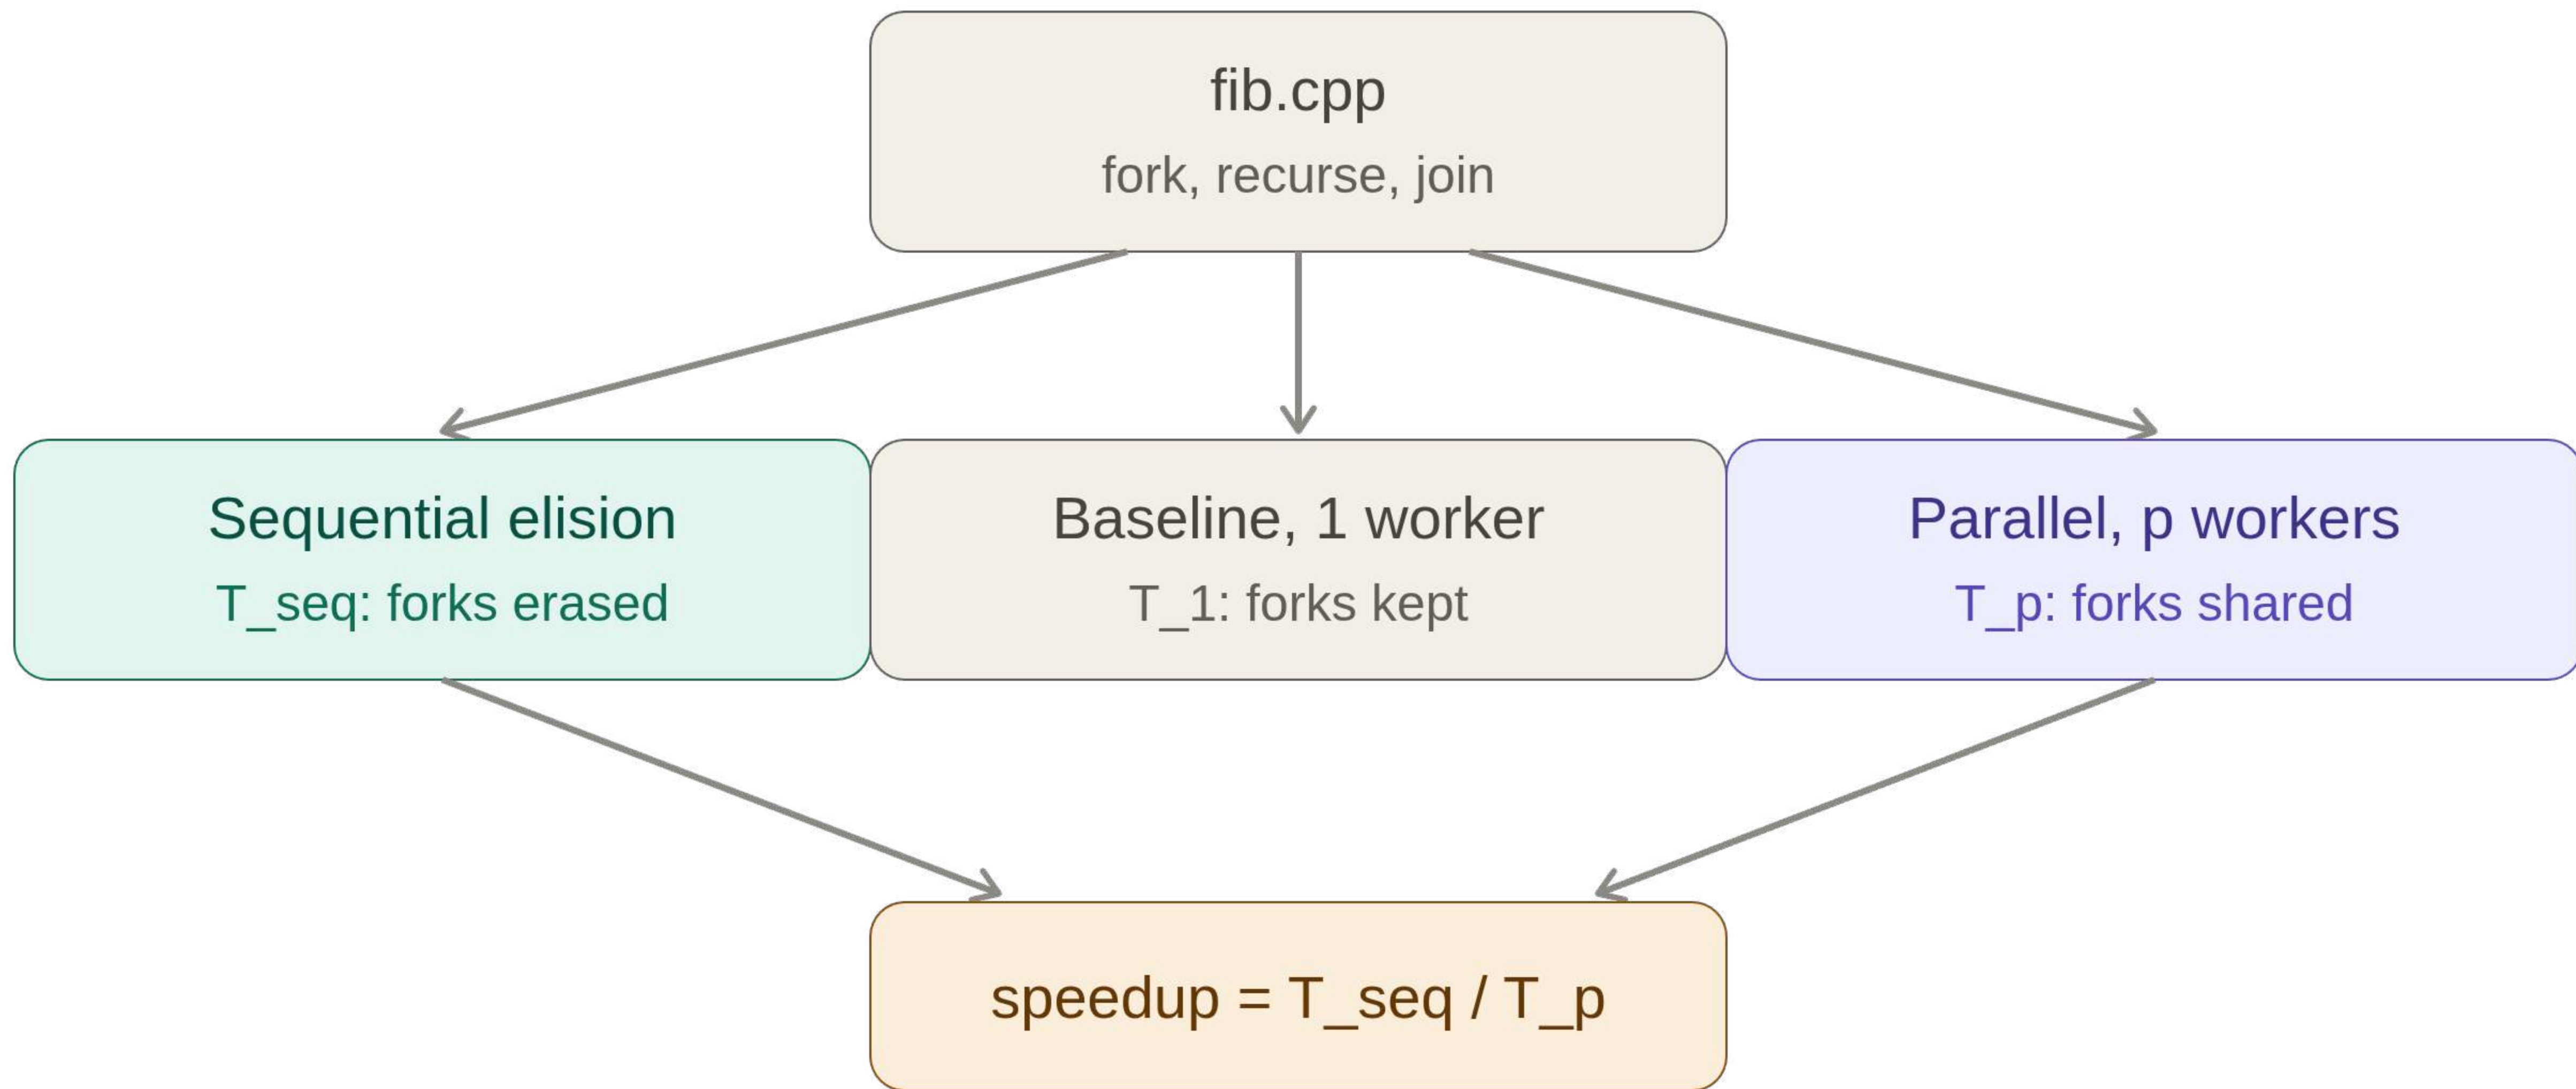

seutil
Timers, command line, containers

chunkedseq
Chunked sequences

graph
Graph processing

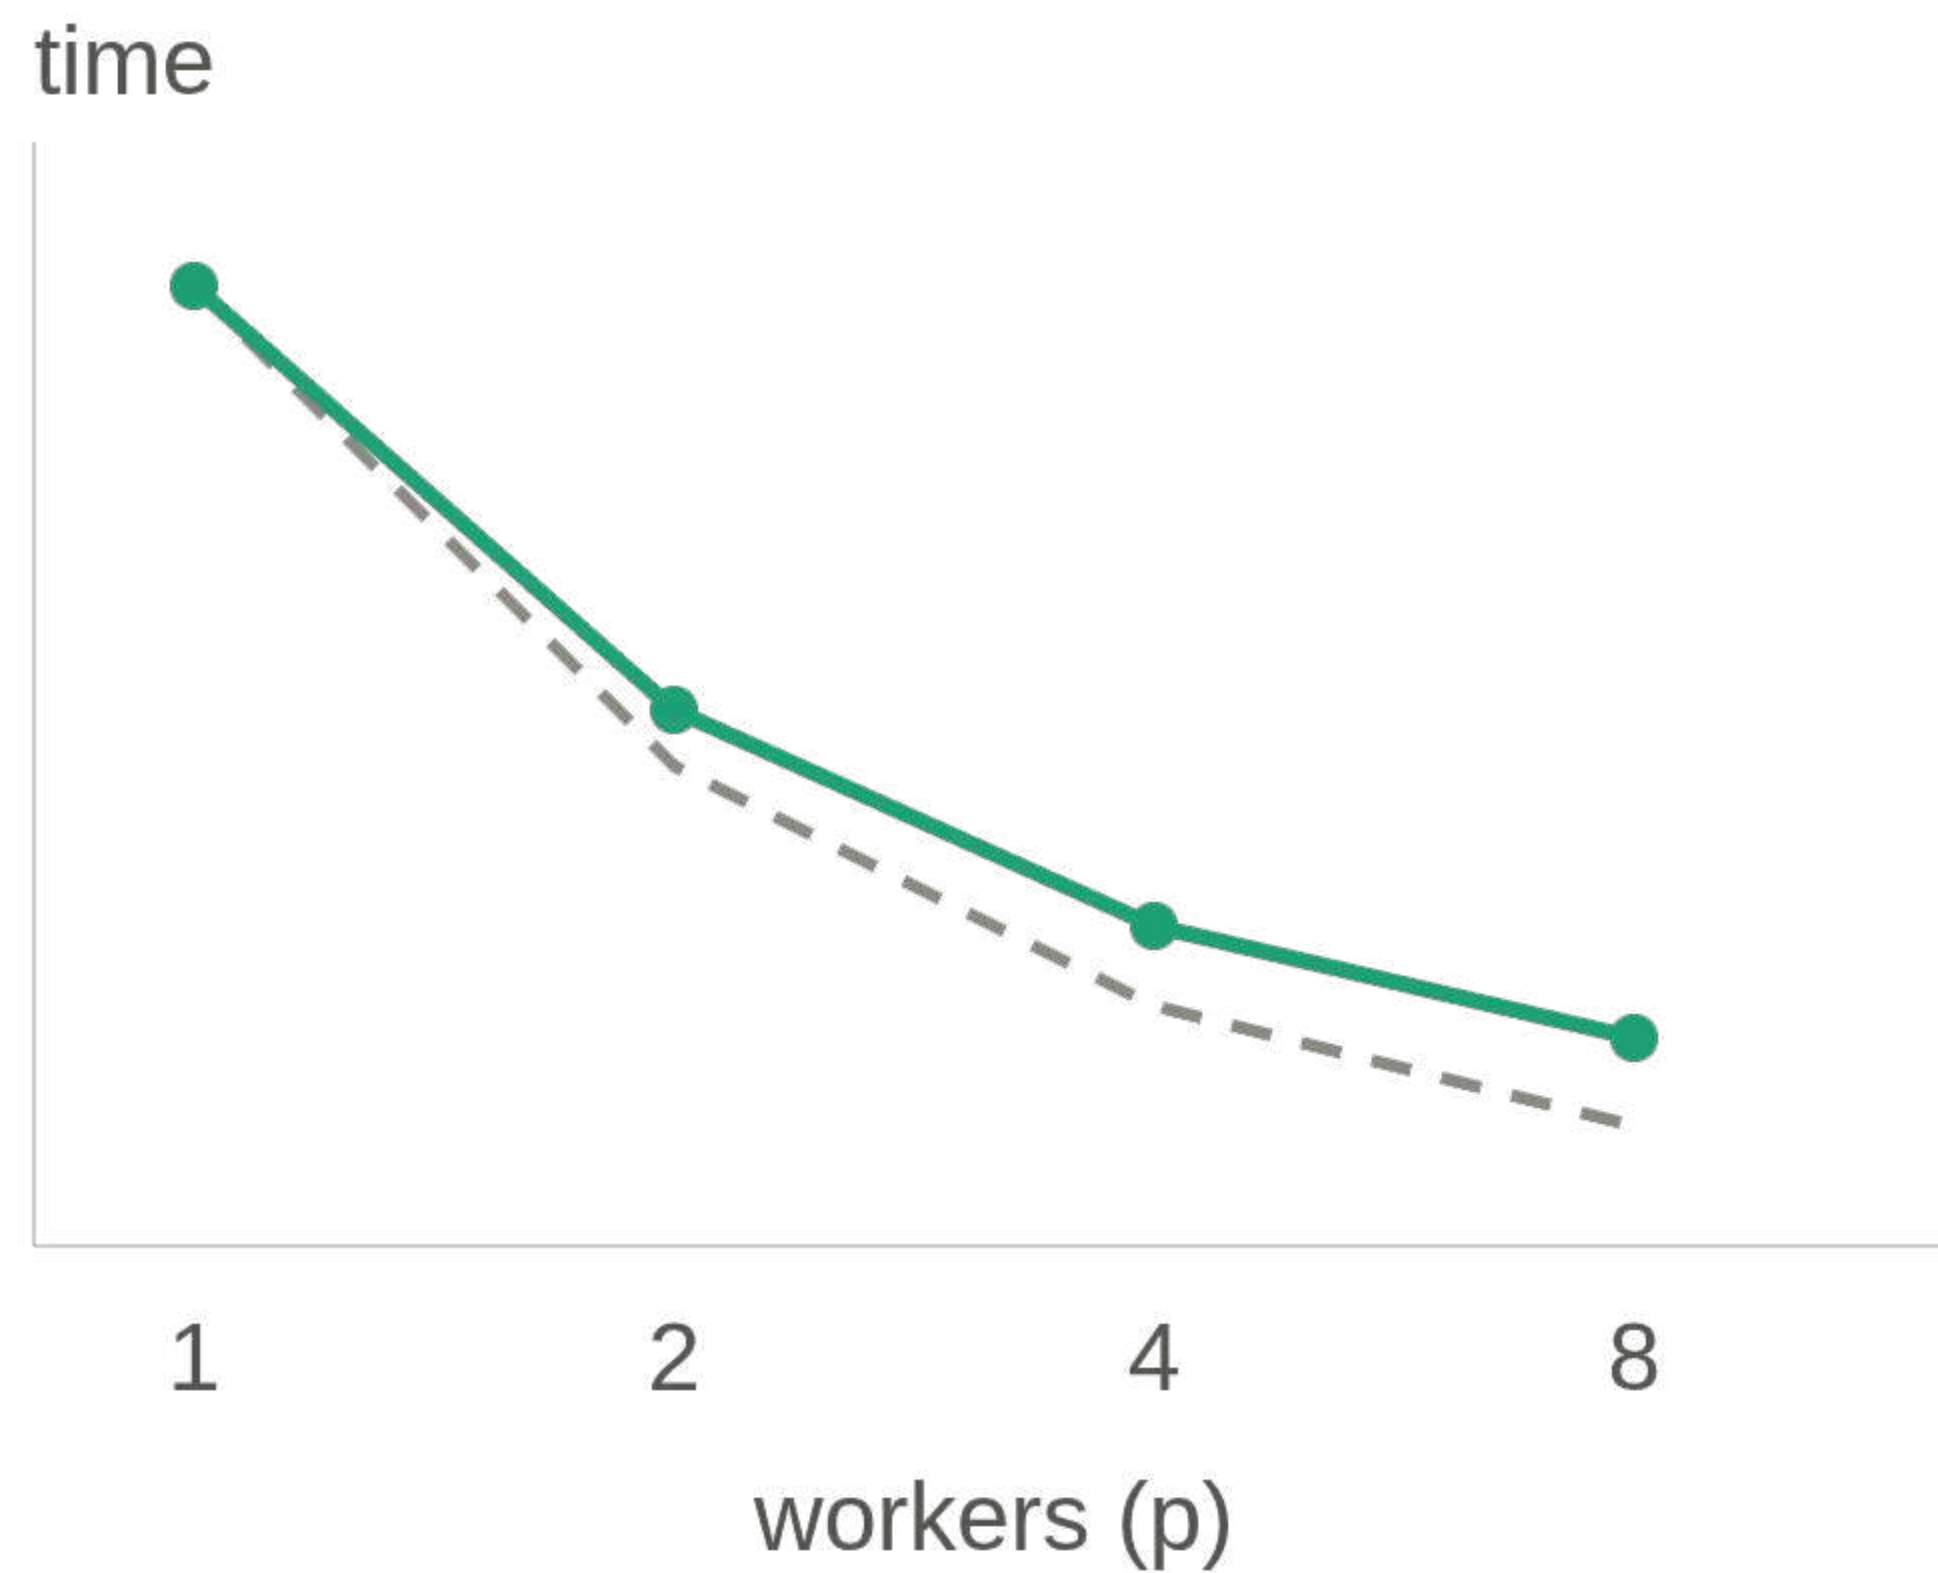

tools
Log viewer, makefiles

Needs: g++ 4.9+, PHP (build), OCaml (log viewer)

Strong scaling

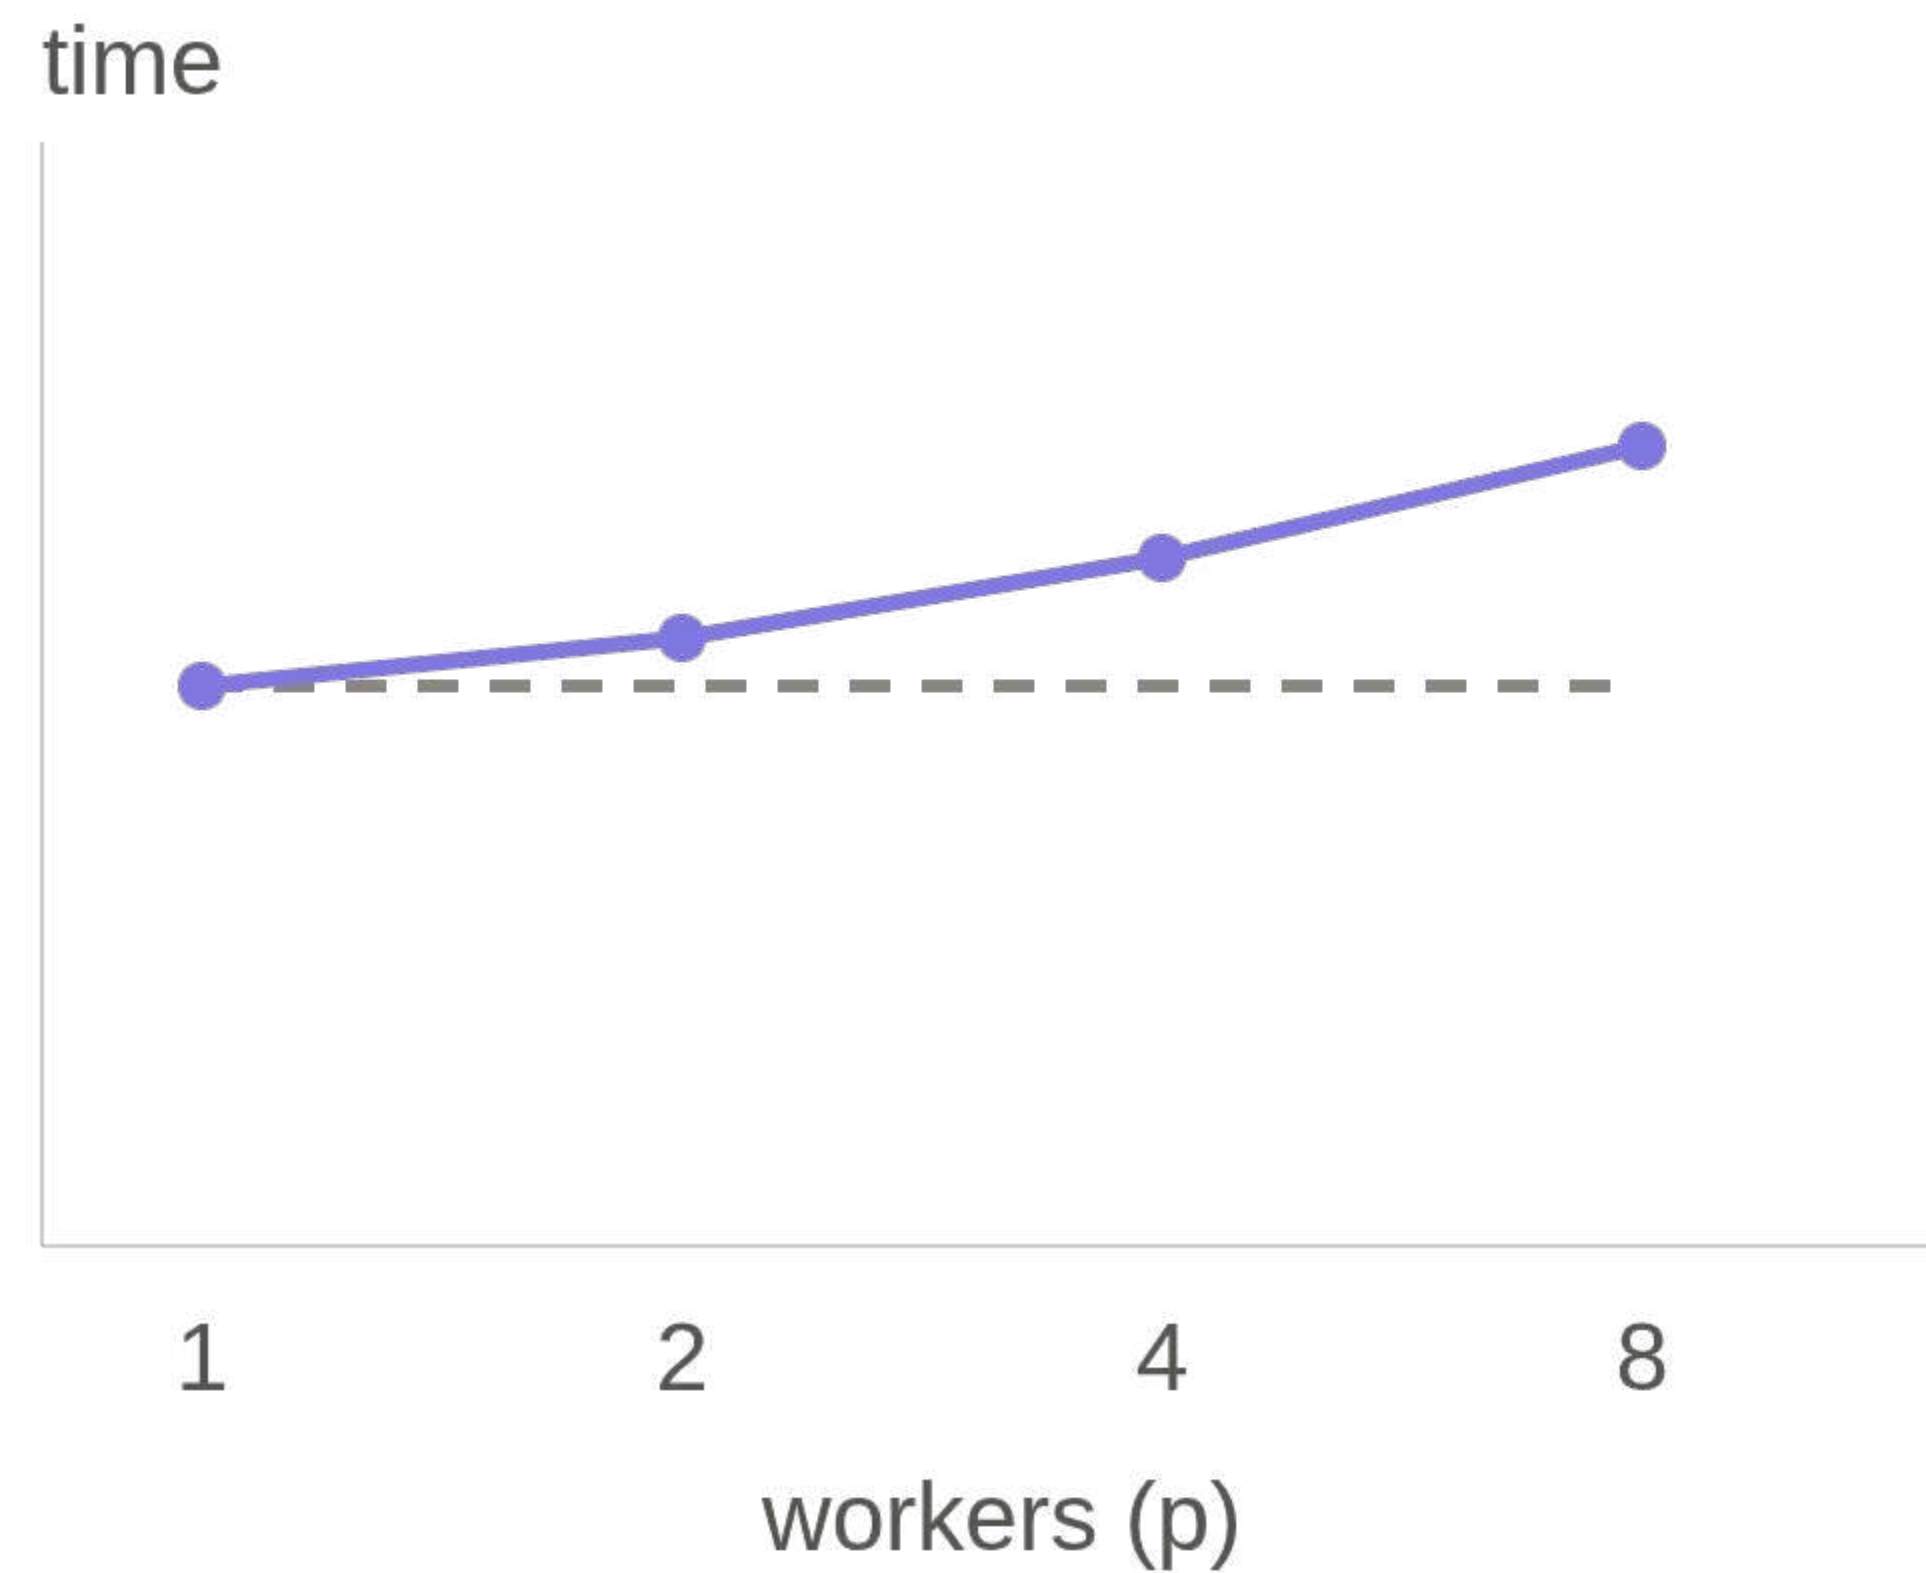

Fixed problem size

--- Ideal

Weak scaling

Work grows with workers

— Measured
